INTRODUCTION

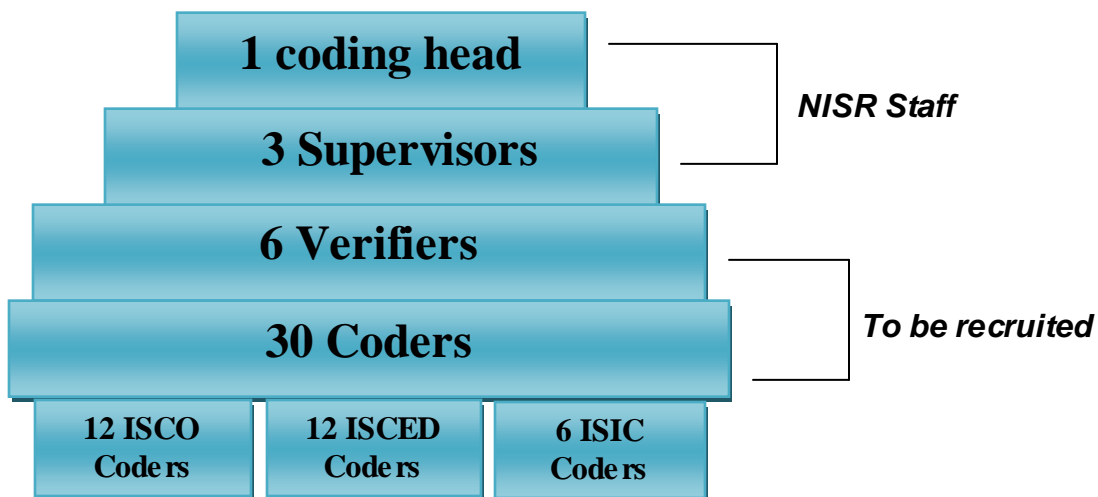

After data collection, the next phase is to process the data collected. This involves manual coding as well as computer processing.

Coding is basically the process of translating word or numerical responses into numerical codes. This process is necessary so as to facilitate computer processing of data.

It is important to note that therefore, great need of accuracy is called for on the part of all coders in ensuring that only the right codes are entered for the appropriate items and columns.

I. THE ORGANIZATION OF CODING WORK

Coding organization will be organized as follows:

1.1. Coders' duties

- To code the questionnaires
- To ensure proper ordering of questionnaires

1.2. Verifiers' duties

- To verify coded questionnaires done by coders

- To verify the duties of coders
- To distribute the work
- To maintain transmission sheets or registry
- To verify technically the quality of work

1.3. Supervisors' duties

- To distribute to verifiers the work
- To receive questionnaires and technical documents from archives
- To ensure that coders in his/her team are producing work of acceptable standard both in quality and quantity (assembly the daily statistics for assessing the work of each person)..
- To ensure good behavior and conduct of each of his/her coders.
- To ensure that uniform solutions to any problems arising during coding are known and used by every coding team.
- To manage the available equipments (materials) to coders under his responsibility
- Provide daily report to the Head coding

1.4. Coding Head's duties

To be responsible for all questionnaires coding;

To ensure that coders and verifiers are performing their job correctly

II. GENERAL INSTRUCTIONS.

2.1. All Coders staff should observe the following:

- ✓ Coding should be prominent and distinctive, that is, clear and readable.
- ✓ Coding should be precise and readable, **i.e.** extra care should be taken while writing like digits, "0" written as "6" can be mistaken as "6" or "7" written as "1" can be mistaken as digit "1"
- ✓ Use red pen during coding. No color other than red should be used for coding.
- ✓ Never change any original entries.
- ✓ Erasing or using correcting fluid (Tippex/blanco) in coding is not allowed. In case of corrections, strike out the wrong code carefully so that it can still be read and write the correct code legibly beside or near the wrong code.
- ✓ Coding should be done within the proper boxes intended for this purpose. If in doubt you should consult the Coding Supervisor immediately.
- ✓ The coders must be careful to ensure that they are performing their job correctly; otherwise the verifiers who are checking the coders' job will be continuously pointing out their omission/errors and thus indicating the coders' poor performance which will entail very close supervision by the supervisor.
- ✓ All coded information should be checked in full and corrections made in green ink.
- ✓ In case there is no appropriate code for some information recorded in the documents, coders/verifiers should consult their Team Leaders who will communicate with the Coding Head who may, if necessary, assign new codes and then instruct all coders accordingly. The coders/verifiers or supervisors may make no amendments or modifications on their own.
- ✓ When you are leaving the coding room for lunch or at the end of the day's work, you must ensure that all the questionnaires are arranged.
- ✓ The daily work is scheduled from 7:00 to 5:00 p.m. Monday to Friday.

2.2. Discipline in the workplace

The workplace must be kept clean and always pleasant atmosphere favorable to work. It is strictly forbidden to the group (coders, verifiers and supervisors):

- To talk or walk in the workroom;
- To smoke in the workroom;
- To sleep in the workroom
- To introduce in the work room someone who is not part of the group;
- To go out the work room with the questionnaires.
- To quarrel or fight on the workplace
- To instigate discussions about political aspect, sporting, and cultural or others, in the workplace.

Any offender (disobedient) liable to severe penalties that could lead to his exclusion. The supervisor must ensure that always a friendly atmosphere within the team and between members of different teams. However, he must bring order, cleanliness, mutual respect, discipline and rigor at work.

III: CODING QUESTIONNAIRES

3 kinds of classifications will be used

1. International standard Industrial classification of all economic activity (ISIC)
2. International standard Classification of occupations (ISCO)
3. International Classification of Domain of education (ISCED)

The codification will be organized as follows:

1. Each type of classification will have specific coders for it. 12 coders for ISCO, 12 Coders for ISCED, and 6 coders for ISIC.
2. The coders will work in teams and each team will have 6 persons: 2 coders for ISCO, 2 coders for ISCED, 1 coder for ISIC and 1 verifier.
3. There will be 6 teams with 6 persons each; consequently 36 persons will be needed (30 coders and 6 verifiers).
4. Coders in one team will work on chains: ISIC → ISCO → ISCED

5. The first day, all coders will work on ISIC, the second day coders for ISCO and ISCED will work on ISCO, while the coders of ISIC will continue to work on ISIC, the third day they will start working on chain as shown in number 4.

You should strictly follow all instructions and any time you have problems or any doubt, always seek clarification from the Coding Head through your team leader.

REMEMBER THE SUCCESS OF THIS EXERCISE DEPENDS ENTIRELY ON YOUR CO-OPERATION, HARD WORK AND COMMITMENT.
