National Institute of Statistics of Rwanda (NISR), The Establishment Census, 2014, June 2015

Foreword

While celebrating its ten years supporting policy making in Rwanda, the National Institute of Statistics of Rwanda (NISR) is pleased to publish herewith the results of the 2014 Establishment Census.

Although this is the second Census in the series, it is superior to the first one, carried out in 2011, as it covers all establishments irrespective of the institutional sector they follow, whereas the 2011 Census was confined to private and mixed institutional sectors.

For the sake of enhancing the usability of this publication, a comparison of 2014 with 2011 censuses has been incorporated. In addition, modified criteria of defining Formal/Informal sectors have been employed.

For the success of this census, the business community in Rwanda deserves utmost gratitude for their cooperation with the Census field personnel. The effective collaboration of the Private Sector Federation (PSF), Ministry of trade and Industry (MINICOM), Ministry of Public Service and Labour (MIFOTRA) and Local Government with NISR is highly appreciated.

I would like also to thank the Census management team for their efforts throughout the planning and implementation stages of the Census.

Finally, the National Institute of Statistics of Rwanda hopes that the results of this Establishment Census would provide invaluable information, concerning the business evolution in Rwanda, to policy makers; researchers; media, as well as the business community, from them the data were secured and to them the results are also targeted.

Yusuf MURANGWA
Director General
National Institute of Statistics of Rwanda

Executive summary

Characteristics of establishments

The total number of establishments amount to 154,236 and nearly 80 percent of them belong to only two major economic activities: Wholesale and retail trade (50.9 percent) and accommodation and food services (28.9 percent).

The three districts of Kigali City have the highest percentage of establishments (7.9 percent for Nyarugenge, 8 percent for Gasabo, and 5.2 percent for Kicukiro). Those districts are followed by Rubavu and Musanze (4.3 percent each) and districts of Muhanga and Nyagatare (3.9 percent each).

Almost all private establishments (99Percent) exclusively belong to Rwandans and 96Percent of them are owned by individuals (sole proprietorship status). Moreover, the overwhelming majority of all establishments employ less than 4 workers; therefore 90Percent of them are classified as micro establishments.

Employment

The total number of in-establishment workers reaches 493,302 persons for which 36 are females.

Around 60Percent of all workers are employed in only the following three economic activities: Trade (24.4 percent), Accommodation and food service activities (17 percent) and education (17 percent).

Some economic activities are male-dominated with the proportion of males higher than 80 percent: mining and quarrying, Construction, Transport and Storage and Administrative and Support service activities.

Changes in establishment characteristics since 2011

A comparison of 2011 and 2014 establishment censuses shows that there was a growth of 24.4 percent in the total number of private and business oriented mixed establishments in this three-year period.

The remarkable increase was observed for establishment involved in the following economic activities: Mining and quarrying scored the highest growth (473.5 percent), construction (42 percent), Accommodation and food service activities (34.1Percent), Human health and social work activities (33.1Percent) and Arts, entertainment and recreation (31.0 percent).

With regard to the establishment size, there is increase in all size categories; however, the increase is profound for large establishments (103.8 percent).

As the change in employment level is concerned, there has been an increase of 35Percent in employment size between 2011 and 2014.

The increase in employment size has been extremely high in Mining and quarrying (572.3 percent), administrative and support services activities (268.3 percent) and Electricity, gas, steam and air conditioning supply (160.4 percent).

Formal and Informal Sectors

The criteria of defining formal/informal sectors based on 2014 establishment census are slightly different from that adopted in 2011. The definition criteria in 2011 were: Enterprise size of at least five workers and registration at Rwanda Revenue Authority (RRA), as well as enterprises below five workers under the condition that they maintain regular accounts in addition to being registered at RRA. As for the criteria adopted in 2014 definition, RRA registration and maintaining regular accounts were jointly used.

On the basis of the above definition criteria, the size of formal enterprises amounts to 10,018 enterprises equivalent to 6.8 percent in Rwanda. The formal enterprises tend to be larger than informal enterprises. In fact, the mean and median size of formal enterprises in terms of workers (15.8 and 4.0) substantially exceeds those of Informal enterprises (1.5 and 1).

The formal enterprises are concentrated in urban (70.8 percent). The reverse pattern manifests for informal enterprises where their urban/rural distribution is 35.5 percent in urban and 64.5 percent in rural.

The Employment size in all enterprises, eligible for formal/informal sector definition, amounts to 370,477 persons of whom 157,827 (about 42.6 percent) belong to formal enterprises. This means that although the prevalence of formal enterprises in the country is as low as nearly 7 percent it absorbs a high proportion of working persons.

The comparison of 2011 and 2014 formal and informal sectors reveals that during the three-year period the formal sector accomplished higher growth (43.7 percent) as compared with informal sector (24.8 percent).

Chapter One: Overview of the second Establishment Census

Establishment Census is a valuable source of information on all economic activities, number of employed and size of establishments in Rwanda.

The methodology of complete counting of every operating establishment that has a fixed location and is practicing a specific economic activity within the boundaries of the city included in the enumeration areas was used.

And since the Establishment Census usually covers all regions in Rwanda, the "2014 Establishment Census" covered all 30 districts.

1.1 Objectives of establishment census

The 2014 Establishment Census is designed to achieve the following objectives:

- To produce a comprehensive and updated data profile of all economic activities practiced by establishments operating in Rwanda;
- To provide detailed tabulations about the establishments' characteristics, e.g. geographical location, number of employees, registration status, legal status, ownership, sector, manager/owner gender;
- To produce data necessary to classify establishments according to size into micro, small, middle, large and very large;
- To lay out the data foundation needed to identify formal and informal economic sectors in Rwanda;
- To help create a comprehensive database with GIS of the business community in Rwanda and enrich the business register that can be used as sampling frame for future economic sample surveys.

1.2 Questionnaire Design

In view of the above mentioned objectives of the 2014 Establishment Census, the Census questionnaire has been designed. The questionnaire of 2011 Establishment Census was slightly modified so as to produce the questionnaire of the present census. Annex II presents the Census Questionnaire.

1.3 Training

Training of trainers: A three-day training session was organised to train field supervisors who were responsible for the field work in provinces and districts. The training took place at Le Printemps Hotel (Kigali) in the period 28th to 30th October, 2014. The purpose of this training was to train senior field personnel. In addition, they bore the responsibility of conducting local training sessions to train enumerators working in their respective areas. Immediately after this training a pre-test was conducted.

Training of enumerators: Five local training centers were set up in one high school at each province and Kigali City. Trainers in each center were those who had attended the training of trainers (ToT). The training took place in the period 16th to 20th November 2014. 502 enumerators and 40 team leaders most of which were provided by the Private sector Federation of Rwanda (PSF) attended the training.

Training of coders: Like almost all censuses, most of census questions are either self-coded or pre-coded. Only two data items needed coding after data collection. The first item is the administrative identification information and the second is the economic activity. In view of the tremendous importance of economic activity coding, NISR decided that the coding be carried out centrally in Kigali by a specially recruited team, after giving this team an intensive training on the coding procedures of the International Standard Industry Classification (ISIC-Ver. 4) and administrative geographical entities. The training which took place on 21st November 2014 was attended by nearly 50 people including 20 coders and 30 data entry clerks. Several examples and exercises were given to trainees. In addition, as a part of the practical training, trainees were requested to perform economic activity coding to the completed pre-test questionnaires. The results were then discussed with trainees and everyone was made aware of the correct coding if he/she has done otherwise.

1.4 Data Collection

The data collection was conducted during a period of 26 days from 24th November to 24th December 2014. Sunday were considered as holidays.

The table below shows the field work organization.

Table 1.1: The field work organization.

	Level	Description
1	National level	This level was organised in 5 regions
2	Regional level	This level was composed by 4 to 10 districts according to geographical and neighboring situation
3	Zone level	This level was composed by 2 to 3 districts that were grouped according to geographical and neighboring situation
4	District	The administrative District (was covered by one Team leader in most area except in districts of Kigali city whereby each district was covered by more than 4 Team Leader)
5	Sector	The administrative sector (was covered by one enumerator in most area except in some urban sectors where the number of enumerator was greater than 2 or more depending on the concentration of establishments)

1.6 Data Processing

The coding of Economic Activity information has been carried out during the period of 01st December 2014 to 02nd January 2015. Some 20 coders were recruited and trained to do coding. Almost in parallel with coding, data entry has taken place in the period of 08th December 2014 to 15th January 2015 by 30 experienced data entry clerks.

1.7 Data validation and Table generation

Data editing has been performed continuously during and after data entry phase for the purpose of detecting out-of-range and/or inconsistent data values. Appropriate actions have been taken to cope with any doubtful data and to introduce necessary corrections. In many cases follow up contacts with the establishments were made in order to verify previously reported data. Upon producing the clean data file, statistical tabulations have been generated. The subsequent chapters present the census tabulations which have previously been planned for.

Chapter Two: Main Census Results

Chapter Two depicts the main Census results with regard to three dimensions:

- 2.1 Establishment characteristics
- 2.2 Employment
- 2.3 Changes in the private sector since 2011

2.1 Characteristics of establishments

2.1.1 Institutional Sector

The total number of establishments amount to 154,236, the overwhelming majority of which (94.8 percent) are in the private sector category (Table 2.1).

Table 2.1 Distribution (Number and Percent) of establishments by institutional sector

INSTITUTIONAL SECTOR	No.	Percent
Total	154,236	100.0
Private	146,227	94.8
Mixed Private and Public	81	.1
Public	1,499	1.0
Cooperative	2,071	1.3
Local NGO	2,406	1.6
International NGO	142	.1
Joint Civil society (CS) and Government	1,810	1.2

2.1.2 Economic Activity

Table 2.2 shows that nearly 80 percent of establishments belong to only two major economic activities: Wholesale and retail trade (50.9 percent) and accommodation and food services (28.9 percent)

Table 2.2: Distribution of establishments (Number and Percent) by economic activity

ECONOMIC ACTIVITY	No.	Percent
Total	154,236	100.0
Agriculture, forestry and fishing	751	.5
Mining and quarrying	282	.2
Manufacturing	10742	7.0
Electricity, gas, steam and air conditioning supply	25	.0
Water supply, sewage, waste management and remediation activities	64	.0
Construction	157	.1
Whole sale and retail trade; repair of motor vehicles and motorcycles	78464	50.9
Transportation and storage	288	.2
Accommodation and food service activities	44626	28.9
Information and communication	404	.3
Financial and insurance activities	1150	.7
Real estate activities	4	.0
Professional, scientific and technical activities	962	.6
Administrative and support services activities	929	.6
Public administration and defence; compulsory social security	104	.1
Education	3483	2.3
Human health and social work activities	1245	.8
Arts, entertainment and recreation	156	.1
Other services activities	10400	6.7

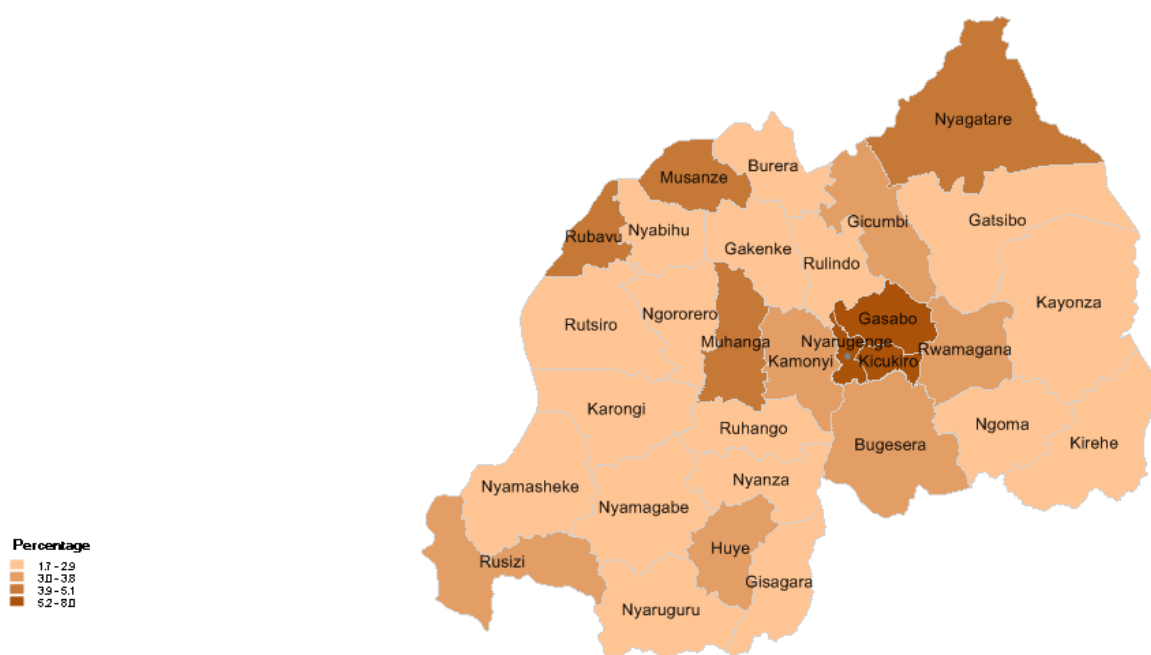

2.1.3 District distribution

As far as the establishment concentration in various districts is concerned, Table 2.3 indicates that districts can be grouped into four categories:

- Districts with highest concentration: As expected the three districts of Kigali City have the highest percentage of establishments (7.9 percent for Nyarugenge, 8 percent for Gasabo, and 5.2 percent for Kicukiro)
- Districts with second highest concentration: These are the districts of Rubavu and Musanze (4.3 percent each) and districts of Muhanga and Nyagatare (3.9 percent each)
- Districts with medium concentration: These are the districts of Huye (3.0 percent), Kamonyi(3.0 percent), Rusizi (3.4 percent), Gicumbi (3.4 percent), Rwamagana (3.1 percent), and Bugesera (3.5 percent)
- Districts with low concentration: This group comprises the remaining seventeen districts, in which the percentage of establishments ranges from 1.7 percent in Gisagara to 2.9 percent in Karongi and Gatsibo each.

Table 2.3: Distribution of establishments (Number and Percent) by district

DISTRICT	No.	Percent
Total	154,236	100.0
Nyarugenge	12,191	7.9
Gasabo	12,337	8.0
Kicukiro	8,091	5.2
Nyanza	3,359	2.2
Gisagara	2,590	1.7
Nyaruguru	3,303	2.1
Huye	4,560	3.0
Nyamagabe	4,314	2.8
Ruhango	3,505	2.3
Muhanga	5,969	3.9
Kamonyi	4,644	3.0
Karongi	4,547	2.9
Rutsiro	4,216	2.7
Rubavu	6,587	4.3
Nyabihu	3,661	2.4
Ngororero	4,202	2.7
Rusizi	5,307	3.4
Nyamasheke	4,450	2.9
Rulindo	3,755	2.4
Gakenke	4,059	2.6
Musanze	6,616	4.3
Burera	3,938	2.6
Gicumbi	5,227	3.4
Rwamagana	4,853	3.1
Nyagatare	6,038	3.9
Gatsibo	4,479	2.9
Kayonza	3,896	2.5
Kirehe	4,075	2.6
Ngoma	4,027	2.6
Bugesera	5,440	3.5

Figure 2.1: Distribution of establishments by District

2.1.4 Establishment size

Similar to all developing countries, the vast majority of establishments in Rwanda is characterized as either Micro (90.1 percent) or small (8.7 percent)- Table 2.4

Table 2.4: Distribution of establishments (Number and Percent) by size based on the number of workers

SIZE	No	Percent
Total	154,236	100.0
Micro(1-3)	138,894	90.1
Small(4-30)	13,385	8.7
Medium(31-100)	1,628	1.1
Large(100+)	329	0.2

2.1.5 Ownership

Expectedly, the overwhelming majority of private sector and business- oriented mixed sector establishments is exclusively owned by Rwandans (99.0 percent)- Figure 2.1.

Figure 2.2: Distribution of establishment in Private and mixed sector by Nationality of owner (review)

2.1.6 Legal Status

The prevalence of sole proprietorship is expectedly the highest (95.7 percent), distantly followed by 'limited by shares' mode of legal status (3.2 percent).

Table 2.5: Distribution of establishment in Private and mixed sector by Legal status

LEGAL STATUS	COUNT	Percent
Total	148,376	100.0
Sole proprietorship	142,029	95.7
Limited by shares	4,688	3.2
Limited by guarantee	156	0.1
Limited by shares and by guarantee	94	0.1
Unlimited	150	0.1
None	1,107	0.7
NS	152	0.1

2.1.7 Registration

Establishments are supposed to register in mandated governmental organizations (see section 8 of annex B). While all functional establishments in Rwanda are supposed to register at concerned administrative Sector and District, Social Security Fund, Rwanda Development Board and Rwanda Revenue Authority It is found that the level of registration is as low as 5.9 percent at Social Security Fund and as high as 79.2 percent at the administrative Sectors. The registration of Private establishments in PSF is substantially low (6.4 percent). In contrary, the registration of cooperatives in Rwanda Cooperative Agency (RCA) is remarkably high (72.7 percent). In addition, less than a half of the NGO's (45.1 percent) are registered in Rwanda Governance Board (RGB).

Table 2.6: Number and Percent of establishments registered at different organizations

REGISTRATION LEVEL	Total	Registered	
		No.	Percent
Sector	154,236	122,202	79.2
District	154,236	85,105	55.2
Rwanda Cooperative Agency (RCA)	2,071	1,505	72.7
Private Sector Federation (PSF)	148,298	9,497	6.4
Rwanda Governance Board (RGB)	1,924	868	45.1
Social Security Fund (RSSB)	154,236	9,153	5.9
Rwanda Development Board (RDB)	154,236	11,137	7.2
Rwanda Revenue Authority (RRA)	154,236	36,538	23.7

2.1.8 Evolution of health and Educational establishments

Information on the year of starting operation has enabled us to trace the trend of the number of establishments over time. It is important to point out that the present trend analysis excludes establishments which entered and exit the market in past years; rather it is only based on the surviving establishments.

Concerning all establishments, it is noticed that (Figure 2.2) most establishments have entered the market since 1995 onward, here it is likely that the trend of all establishments is confounded by upward shift in the reported year of starting operation. Nonetheless, the trend of education and 'health and social' institutions over time is most likely real as data is obtained from organized institutions maintaining records. Starting from 1970 until 1990 the annual increase in the percentages of educational and health institutions are almost stable. Apart from the War and Genocide period (1990-1994) there exists remarkable surge in the annual increase of both educational and health institutions. The reason behind emphasizing health and educational institutions in this trend analysis is their profound relevance to human development in Rwanda.

Figure 2.3: Evolution of all establishments in Rwanda

Figure 2. 4: Evolution of health and education establishments in Rwanda (change below in before) and check the trend

2.2: Employment

The total number of in-establishment workers reaches 493,302 persons (Table 2.7). They are not evenly distributed over districts. Rather, the percentage of employed personnel shows relative high concentration in the three districts of Kigali City where the percentage ranges from 6.2 to 11.6. In the rest of the country, the percentage of workers is as low as 1.8 in Ruhango and as high as 3.8 in Musanze. In General, the distribution of workers in districts is largely consistent with the distribution of the establishments in districts.

The gender structure indicates that 36.3 percent of workers are females in the whole country. The prevalence of female workers varies to some extent over districts; it ranges from 26.7 percent in Rulindo to 40 percent in Huye.

Table 2.7: District distribution of Number of workers and gender structure by district

District	TOTAL WORKERS		MALE		FEMALE	
	Number	Percent	Number	Percent	Numbers	Percent
Total	493,302	100	314,154	63.7	179,148	36.3

Kirehe	11,392	2.3	7,533	66.1	3,859	33.9
Ngoma	11,933	2.4	7,543	63.2	4,390	36.8
Bugesera	15,481	3.1	9,345	60.4	6,136	39.6

As far as the Economic activity distribution of workers is concerned (Table 2.8), It is found that slightly below 60 percent of workers concentrate on only three economic activities: where 24.4 percent of workers belong to 'Wholesale and retail trade repair of motor vehicles and motorcycles'; 16.7 percent of workers are engaged in 'Accommodation and food service activities' and 16.9 percent of workers belong to educational institutions. Furthermore, it is found that more than a quarter of working persons are involved in other four economic activities namely; Manufacturing (8.0 percent); Agriculture, forestry and fishing (5.6 percent); 'Human health and social work activities' (5.4 percent) and other service activities (6.7 percent).

Unlike the gender structure of workers over districts, gender structure associated with economic activities shows substantial variation. With reference to the nature of certain economic activities which are mostly male dominated; the percentage of female workers is as low as 12.7 percent in mining and quarrying; 15.5 percent in Construction; 13.1 percent in transport and storage and 18.2 percent in administrative and support service activities.

On the other extreme, the percentage of female workers attains its highest score in Agriculture, forestry and fishing (45.8 percent); Financial and insurance activities (43.0 percent); Education (41.0 percent) and Human health and social work activities (52.3 percent). As for the remaining economic activities, the percentage of female workers fluctuates from 21.2 percent in other service activities to 39.3 percent in Wholesale and retail trade, repair of motor vehicles and motor cycles.

Table 2.8: Economic Activity distribution of Number of workers and gender structure by Economic activity

Economic Activity	TOTAL WORKERS		Gender		Percentage	
	Count	Percent	Male	Female	Male	Female
Total	493,302	100	314,154	179,148	63.7	36.3

Arts, entertainment and recreation	1,470	0.3	1,057	413	71.9	28.1
Other services activities	33,241	6.7	26,194	7,047	78.8	21.2

2.3: Changes in establishment characteristics since 2011

A comparison of 2011 and 2014 establishment censuses shows that there was a growth of 24.4 percent in the total number of private and business oriented mixed establishments in this three-year period (Table 2.9). The percentage increase in urban (7.3 percent) is much less than that of rural (38 percent), Table 2.10.

2.3.1 Changes according to economic activity

The distribution of businesses by economic activity shows that the majority of economic activities achieved a positive growth. Mining and quarrying scored the highest growth (473.5 percent), followed by construction with a percentage increase of 41.8 percent. Other economic activities that have shown increase of more than 30 percent are Accommodation and food service activities (34.1percent), Human health and social work activities (33.1percent); Arts, entertainment and recreation (31.0 percent).

However there was a decrease between 2011 and 2014 for some economic activities namely:

- Electricity, gas, steam and air conditioning supply (85.2 percent), the decrease of establishments in this economic activity has occurred since a big number of electricity sell points has been closed due to introduction of new method of buying electricity (electronic methods like use of mobile phone).
- Information and communication (28.3 percent), the decrease between the two censuses is explained by closing of a number of cyber café that were present in 2011 due to wider access of internet services at work, schools and by mobile phones).

Table 2.9: Percent change from 2011 to 2014 of private establishments and business oriented mixed sector establishments by economic activity

ECONOMIC ACTIVITY	2011	2014	Percentage change
Total	119,270	148,376	24.4
Agriculture, forestry and fishing	667	724	8.5
Mining and quarrying	49	281	473.5
Manufacturing	9,118	10,730	17.7
Electricity, gas, steam and air conditioning supply	135	20	-85.2
Water supply, sewage, waste management and remediation activities	221	49	-77.8
Construction	110	156	41.8
Whole sale and retail trade; repair of motor vehicles and motorcycles	64,676	78,453	21.3
Transportation and storage	263	282	7.2
Accommodation and food service activities	33,285	44,621	34.1
Information and communication	554	397	-28.3
Financial and insurance activities	968	1,146	18.4
Real estate activities	17	4	-76.5
Professional, scientific and technical activities	897	932	3.9
Administrative and support services activities	745	917	23.1
Private formal Education	496	499	0.6
Human health and social work activities	344	458	33.1
Arts, entertainment and recreation	100	131	31.0
Other services activities	6,437	8495	32.0
Not stated	188	81	-56.9

Table 2.10 shows percent change from 2011 to 2014 of private establishments and business oriented mixed establishments by economic activity according to urban/rural areas. In rural area, the highest increase in the number of establishments between the two censuses was observed in mining and quarrying (603 percent), followed by construction (600 percent), administrative and support work activities (190 percent), and human health and social work activities (101 percent). As for the remaining economic activities which experienced growth during the period, the percentage increase range from 9 percent for information and communication to 42 percent for other services activities.

The highest decrease in the number of establishments in rural areas reaches 87 percent for electricity, gas steam and air conditioning supply. The reason of a such decrease is the same as previously mentioned commenting on table 2.9. The second highest decrease in rural areas is observed in water supply, sewage, waste management and remediation activities (77 percent), distantly followed by Arts, entertainment and recreation (17 percent); transportation and storage (6 percent) and professional, scientific and technical activities (2 Percent).

In the same vein, in urban area, there were some economic activities for which the number of establishments increased from 2011 to 2014, and for others it decreased. The economic activity which has shown remarkable increase in urban areas are Mining

and quarrying (150 percent); Arts, entertainment and recreation (46 percent) and construction (31.5 percent). For the remaining economic activities which experienced growth, percentage increase varies from 5.4 percent for manufacturing to 13.8 percent for Accommodation and food service activities.

Regarding the declining activities, the highest decrease in urban areas was reported for Electricity, gas, steam and air conditioning supply (84.5Percent percent), Real estate activities (82.4 percent) and Water supply, sewage, waste management and remediation activities (78.1Percent percent). As for the remaining declining economic activities; the percentage decrease varies from 1.5 percent for Administrative and support services activities to 48.5 percent for Agriculture, forestry and fishing.

Table 2.10: Percent change from 2011 to 2014 of private establishments and business oriented mixed establishments by economic activity according to urban/rural areas

ECONOMIC ACTIVITY	Rural			Urban		
	2011	2014	Percent changes	2011	2014	Percent changes
Total	66,314	91,581	38	52,938	56,795	7.3

Not stated	52	15	-71	118	66	-44.1

2.3.2 Changes according to District

Table 2.11 shows that 28 districts have experienced increase in the number of establishments. The percentage increase varies substantially over districts, where it is at its lowest levels 1.3 percent for Musanze, 6.1 percent for Burera and 6.5 for Rusizi. The highest increase (132.5 percent) has been achieved in Gatsibo district. As for the

remaining growing districts, the percentage increase fluctuates from 9.7 percent for Ngoma to 63.4 percent for Nyamasheke district.

The two districts which experienced a decline are Nyarugenge (1.8 percent) and Gicumbi (3.1 percent).

Table 2.11: Percent change from 2011 to 2014 of private establishments and business oriented mixed establishments by district

DISTRICT	2011	2014	Percentchange
Total	119,270	148,376	24.4
Nyarugenge	12,191	11,971	-1.8

Kirehe	3,206	3,940	22.9
Ngoma	3,518	3,858	9.7
Bugesera	3,172	5,154	62.5

2.3.3 Change according to establishment size

Establishment size is determined basing on the number of workers. The following four categories were define: Micro (1 to 3 workers), Small (4-30 workers), Medium (4-30 workers) and Large (100 workers and above).

With regard to the establishment size, there is increase in all size categories. The increase is profound for large establishments (103.8 percent), followed by small establishments (28.2 percent), micro (24.1 percent). The medium size establishments have achieved the lowest increase (19 percent).

Table 2.12: Percent change from 2011 to 2014 of private establishments and business oriented mixed establishments by establishment size category

Size	Count		Percent increase
	2011	2014	
Total	119,270	148,376	24.4
Micro(1-3)	111,204	138,039	24.1
Small(4-30)	7,479	9,585	28.2
Medium(31-100)	453	539	19.0
Large(100+)	105	213	102.9

2.3.4 Change in employment size

Table 2.13 displays employment changes according to economic activities. In total, the increase in employment size (34.9 percent) exceeds the increase in the number of establishment during the period under study (24.4 percent).

The increase in employment size has been extremely high in Mining and quarrying (572.3 percent), administrative and support services activities (268.3 percent) and Electricity, gas, steam and air conditioning supply (160.4 percent). As for the remaining economic activities indicating employment growth, the level ranges from 2.6 percent for Professional, scientific and technical activities to 81.2 percent for Financial and insurance activities.

On the other side there exist three economic activities experienced decline in employment size during the indicated period. Those activities are in order of magnitude: Real estate activities (94.5 percent), Water supply, sewage, waste management and remediation activities (24.5 percent) and construction (9.8 percent).

Table 2.13: Employment change from 2011 to 2014 in private establishments and business oriented mixed establishments by economic activity

ECONOMIC ACTIVITY	2011	2014	Percentage change
Total	264,648	355,883	34.5
Agriculture, forestry and fishing	22,653	26,273	16
Mining and quarrying	2,407	16,182	572.3
Manufacturing	34,504	39,581	14.7
Electricity, gas, steam and air conditioning supply	671	1,747	160.4
Water supply, sewage, waste management and remediation activities	944	704	-25.4
Construction	5,639	5,087	-9.8
Whole sale and retail trade; repair of motor vehicles and motorcycles	93,551	120,419	28.7
Transportation and storage	2,926	4,532	54.9
Accommodation and food service activities	59,581	82,040	37.7
Information and communication	1,621	1,824	12.5
Financial and insurance activities	6,343	11,195	81.2
Real estate activities	163	9	-94.5
Professional, scientific and technical activities	2,789	2,861	2.6
Administrative and support services activities	2,999	11,045	268.3
Private formal Education	9,261	9,323	0.7
Human health and social work activities	2,736	4,109	50.2
Arts, entertainment and recreation	511	857	67.7
Other services activities	14,385	17,636	22.6
Not stated	964	459	-52.4

Table 2.14 reveals changes in employment according to the size category of establishment. Evidently, there is employment increase in all size categories. The percentage increase ranges from 24.6 percent for small establishments to 55.3 percent for large establishments.

Table 2.14: Employment change from 2011 to 2014 in private establishments and business oriented mixed establishment by establishment size category.

Size	Count		Percent CHANGE
	2011	2014	
Total	264,648	355,883	34.5
Micro(1-3)	140,295	186,357	32.8
Small(4-30)	57,909	72,153	24.6
Medium(31-100)	21,539	27,624	28.3
Large(100+)	44,905	69,749	55.3

Concerning employment change according to urban /rural, the employment increased in both areas with a higher increase in rural areas as compared to urban. Table 2.15

shows that the increase in rural areas is twice as higher as the one in urban areas (respectively 48 percent and 22 percent).

Table 2.15: Employment change from 2011 to 2014 in private establishments and business oriented mixed establishment by urban and rural

Urban/rural	2011	2014	PercentChange
Total	264,648	355,883	34.5
Rural	125,538	185,636	47.9
Urban	139,110	170,247	22.4

Chapter Three: Formal and Informal Sectors

3.1-Introduction

The 15th International Conference of Labour Statisticians (ICLS) of ILO, 2000 has defined the **Informal Sector enterprises** on the basis of the following criteria¹

- They are private unincorporated enterprises, i.e. enterprises owned by individuals or households that are not constituted as separate legal entities independently of their owners, and for which no complete accounts are available that would permit a financial separation of the production activities of the enterprise from the other activities of its owner(s). Private unincorporated enterprises owned and operated by individual household members or by several members of the same households, as well as unincorporated partnerships and co-operatives formed by members of different households, if they lack complete set of accounts,
- All or at least some of the goods and services produced are meant for sale or barter, with the possible inclusion in the informal sector of households which produce domestic or personal services in employing paid domestic employees,
- Their size in terms of employment is below a certain threshold to be determined according to national circumstances (below 5 employed persons is recommended) , and/or they are not registered under specific forms of national legislation (such as factories' or commercial acts, tax or social security laws, professional group's regulatory acts, or similar acts, laws or regulations established by national legislative bodies,
- They are engaged in non-agricultural activities.

The term "enterprise" is used here in a broad sense, referring to any unit engaged in the production of goods or services for sale or barter. It covers not only production units, which employ hired labour, but also production units that are owned and operated by single individuals working on own account as self-employed persons, either alone or with the help of unpaid family members. The activities may be undertaken inside or outside the enterprise owner's home, and they may be carried out in identifiable premises, unidentifiable premises or without fixed location. Accordingly, self-employed street vendors, taxi drivers, home-based workers, etc. are all considered enterprises.(to put this paragraph at the)

In the light of the above, Formal sector enterprise comprise corporations, non-profit institutions, unincorporated enterprises owned by government units, and those private unincorporated enterprises producing goods or services for sale or barter which are not part of the informal sector.

¹ http://www.ilo.org/public/libdoc/ilo/1992/92B09_385_engl.pdf

Table 3.1 summarizes the ILO distinction between formal and informal enterprises on the basis of above mentioned criteria

Table 3. 1: The ILO distinction between Formal and Informal sectors

Criterion	Formal Sector	Informal Sector
Complete accounts	Yes	No
Employment size	5+	1-4
Registration	Yes	No
Production of goods/services for sale or barter in non-agricultural activities	Yes	Yes

3.2 Criteria for defining formal/informal sectors in Rwanda on the basis of the 2014 Establishment Census

The 2014 Establishment Census has enumerated all functional establishments in Rwanda. The establishment is defined as an enterprise or part of an enterprise with constant site, performing one or more economic activity under one administration. An enterprise, on the other hand, is either a standalone establishment or a multi-branch entity; each of its branches is considered an establishment. An enterprise, rather than establishment, is the unit which has been used for the definition of Formal/Informal sector in Rwanda.

The 2014 establishment Census comprises some information that can be utilized in creating an objective and evidence-based definition of formal/informal economic sectors in Rwanda. This information includes:

- **Registration at Rwanda Revenue Authority (RRA):** registration is verified if the enterprise pays any of VAT, TPR or Income taxes.
- **Whether the enterprise maintains regular operational accounts:** the regular operational accounts are indispensable in compiling all other accounts such as profit/loss account, balance sheet, etc.
- **Total number of employed workers:** employment includes self-employed, employers, unpaid family workers and hired employees.
- **Production of goods/services for sale or barter:** This information item has not specifically been included in the Establishment Census questionnaire. Nonetheless the Industry Classification (ISIC-R 4) of the enterprise main economic activity has been used as a proxy to determine whether the enterprise produces goods/services for sale or barter.

Since the size criterion (in terms of number of employed persons) is of low importance in characterising many small enterprises as belonging to formal sector, it is decided to relax the size criterion and limit the definition to Maintaining operational accounts and RRA registration, in addition to Production of goods/services for sale or barter in non-agricultural activities.

In view of above considerations, the criteria of defining formal/Informal sectors in Rwanda are presented in Table 3. 2.

Table 3. 2: The distinction between Formal and Informal sectors in Rwanda

Criterion	Formal Sector	Informal Sector
Regular Operational accounts	Yes	No
RRA registration	Yes	No
Production of goods/services for sale or barter in non-agricultural activities	Yes	Yes

3.2.1: Level of Formal/Informal sector in Rwanda:

On the basis of the above definition criteria of formal and informal enterprises, the size of formal enterprises amounts to 10,018 enterprises equivalent to 6.8 percent of all eligible enterprises in Rwanda (Table 3.3). While all mixed and public enterprises are found formal, 62.2 percent of cooperatives and only 5.3 percent of private enterprises are formal.

Table 3. 3: Prevalence of Formal/Informal enterprises according to Institutional sector

Institutional sector	Formal/Informal for private & public					
	Total		Formal		Informal	
	No.	Percent	No.	Percent	No.	Percent
Total	147,717	100.0	10,018	6.8	137,699	93.2
Private	144,808	100.0	7,707	5.3	137,101	94.7
Mixed Private and Public	33	100.0	33	100.0	0	0.0
Public	1,292	100.0	1,292	100.0	0	0.0
Cooperative	1,584	100.0	986	62.2	598	37.8

3.3 Distinction between Formal and Informal enterprises in Rwanda

3.3.1: Distribution of Formal/Informal enterprises according to Institutional Sector

Table 3.4 shows that the overwhelming majority of formal enterprises (76.9 percent) belong to private sector, mixed and public sector contains only 0.3 and 12.9 percent respectively and cooperatives represent 9.8 percent. The informal enterprises exclusively belong to the private sector.

Table 3. 4: Distribution of Formal/Informal enterprises according to Institutional Sector

Institutional sector	Formal/Informal for Private & Public					
	Total		Formal		Informal	
	No.	Percent	No.	Percent	No.	Percent
Total	147,717	100.0	10,018	100.0	137,699	100.0
Private	144,808	98.0	7,707	76.9	137,101	99.6
Mixed Private and Public	33	.0	33	.3	0	0.0
Public	1,292	.9	1,292	12.9	0	0.0
Cooperative	1,584	1.1	986	9.8	598	.4

3.3.2: Distribution of Formal/Informal enterprises according to Size

Table 3.5 shows the size distribution of Formal and Informal enterprises. Clearly the formal enterprises tend to be larger than informal enterprises. Moreover, the mean and median size of formal enterprises (15.8 and 4.0) substantially exceed those of Informal enterprises (1.5 and 1) as illustrated by the figure 3.1. This is strong evidence that although the size criterion has not been explicitly considered in defining formal/informal sectors, the adopted two criteria have successfully detected size differential between formal and informal sectors.

Table 3. 5: Distribution of Formal/Informal enterprises according to Size

Size	Formal/Informal for Private & Public					
	Total		Formal		Informal	
	No.	Percent	No.	Percent	No.	Percent
Total	147,717	100.0	10,018	100.0	137,699	100.0
Micro(1-3)	137,147	92.8	4,414	44.1	132,733	96.4
Small(4-30)	9,554	6.5	4,680	46.7	4,874	3.5
Medium(31-100)	834	.6	754	7.5	80	.1
Large(100+)	182	.1	170	1.7	12	.0

Figure 3. 1: Mean and Median size of formal and informal enterprises

3.3.3: Distribution of Formal/Informal enterprises according to Economic Activity

Table 3.6 displays the economic activity distribution of formal and informal enterprises. In general, the percentage of formal enterprises according to economic activity exceeds or is in the same vicinity as informal sector enterprises for the majority of economic activities. The major economic activities for which the reverse pattern exists are wholesale and retail trade (42.0 percent for formal and 52.8 percent for informal) and Accommodation and food service activities (12.2 percent for formal and 30.1 percent for informal).

Table 3. 6: Distribution of Formal/Informal enterprises according to Economic Activity

Economic activity	Formal/Informal for Private & Public					
	Total		Formal		Informal	
	No.	Percent	No.	Percent	No.	Percent
Total	147,717	100.0	10,018	100.0	137,699	100.0
Mining and quarrying	252	.2	127	1.3	125	.1
Manufacturing	10,684	7.2	681	6.8	10,003	7.3
Electricity, gas, steam and air conditioning supply	13	.0	13	.1	0	0.0
Water supply, sewage, waste management and remediation activities	36	.0	18	.2	18	.0
Construction	149	.1	126	1.3	23	.0
Whole sale and retail trade; repair of motor vehicles and motor cycles	78,038	52.8	4,204	42.0	73,834	53.6
Transportation and storage	248	.2	152	1.5	96	.1

Administrative and support services activities	895	.6	212	2.1	683	.5
Education	1,511	1.0	1,295	12.9	216	.2
Human health and social work activities	739	.5	507	5.1	232	.2
Arts, entertainment and recreation	89	.1	27	.3	62	.0
Other services activities	8,468	5.7	263	2.6	8,205	6.0

3.3.4: Distribution of Formal/Informal enterprises according to Urban/Rural residence

Expectedly, the formal enterprises concentrate in urban (70.8 percent) rather than rural (29.2 percent). The reverse pattern manifests for informal enterprises where their urban/rural distribution nearly matches the urban/rural distribution of the whole population (35.5 percent in urban and 64.5 percent in rural) - Table 3.7

Table 3. 7: Distribution of Formal/Informal enterprises according to Urban/Rural residence

Rural/Urban	Formal/Informal for Private & Public					
	Total		Formal		Informal	
	No.	Percent	No.	Percent	No.	Percent
Total	147,717	100.0	10,018	100.0	137,699	100.0
Rural	91,671	62.1	2,921	29.2	88,750	64.5
Urban	56,046	37.9	7,097	70.8	48,949	35.5

3.3.5: Distribution of Formal/Informal enterprises according to district

The concentration of formal sector enterprises in urban areas is consistent with the notable relative concentration of such enterprises in the Capital city of Kigali, where more than 47 percent of the formal enterprises exist in the three districts of Kigali altogether (Table 3.8). Distantly lower than Kigali level, the percent of formal enterprises is at the level of three or four percent in the districts of Huye (3.8 percent), Muhanga (3.0 percent), Rubavu (4.0 percent), Rusizi (3.3 percent), Musanze (3.4 percent), and Nyagatare (3.2 percent). The percent of formal enterprises in other districts ranges from one and less than three.

Analogues to the district distribution of formal sector enterprises, the informal sector enterprises score the highest percentages in Kigali where it reaches 6.8 percent in Nyarugenge, 7.6 percent in Gasabo and 5.0 percent in Kicukiro. The percentage in other districts of the country fluctuates from 1.7 percent in Gisagara to 4.4 percent in Musanze.

Table 3. 8: Distribution of Formal/Informal enterprises according to district

District	Formal/Informal for Private & Public					
	Total		Formal		Informal

3.3.6: Distribution of Formal/Informal enterprises according to year of starting operation

Table 3.9 shows the time trend of the year of starting operation for Formal and Informal enterprises. With the beginning of 1970, the increase in the three-year period of the number of Formal enterprises was lower than a 100. Yet, the increase has become tangible starting from 1994-1996, and accelerated substantially since 2006. The Informal enterprises show similar increasing trend over time with likely over reporting of the year of starting operation in 2012-2014 period.

Table 3. 9: Distribution of Formal/Informal enterprises according to year of starting operation

Period in 3 year Interval	Formal/Informal for Private & Public					
	Total		Formal		Informal	
	No.	Percent	No.	Percent	No.	Percent

2009-2011	24,128	16.3	2,461	24.6	21,667	15.7
2012-2014	102,759	69.6	4,312	43.0	98,447	71.5
Not stated	99	.1	26	.3	73	.1

3.3.7: Distribution of Formal/Informal enterprises in private and mixed institutional sectors according to employed capital category

As expected, the employed capital of Formal enterprises must be greater than that of informal ones. Table 3.10 confirms this reality. Lower capital employed (less than 500, 000 Frw) is reported only by 16.2 for formal compared with 80.2 percent for informal enterprises.

Table 3. 10: Distribution of Formal/Informal enterprises in private and mixed sectors according to Employed Capital category

Employed Capital	Formal/Informal for Private & Public					
	Total		Formal		Informal	
	No.	Percent	No.	Percent	No.	Percent
Total	146,425	100.0	8,726	100.0	137,699	100.0
Less than 500.000	111,840	76.4	1,417	16.2	110,423	80.2
500.000 - 15 million	32,105	21.9	5,154	59.1	26,951	19.6
More 15 to 75 million	1,334	.9	1,182	13.5	152	.1
More than 75 million	1,146	.8	973	11.2	173	.1

3.3.8 Distribution of Formal/Informal enterprises in private and mixed sectors which started operation in or before 2013 according to the category of reported turnover in 2013

Enquiry about turnover is known to be sensitive, to which respondent may be reluctant to respond and if they do most likely they under estimate the reality. Although the relevant question in the Census questionnaire was designed, intelligently, in categorical format, as appear in Table 3.11, it seems that the data is not free from downward bias especially for informal sector where 99.3 percent of enterprises reported turnover of no more than 12 million in 2013. In addition, only about 24.5 percent of formal enterprises reported turnover greater than 20 million FRW in 2013 (Table 3.11)

Table 3. 11: Distribution of Formal/Informal enterprises in private and mixed sectors which started operation in or before 2013 according to Turnover category in 2013

Turnover	Formal/Informal for Private & Public					
	Total		Formal		Informal	
	No.	Percent	No.	Percent	No.	Percent
Total	84,877	100.0	6,879	100.0	77,998	100.0
Less than 300.000	47,815	56.3	656	9.5	47,159	60.5
300.000 - 12 million	34,019	40.1	3,754	54.6	30,265	38.8
12-20 million	1,170	1.4	771	11.2	399	.5
More than 20 to 50 million	665	.8	599	8.7	66	.1
More than 50 million	1,124	1.3	1,084	15.8	40	.1
NS	84	.1	15	.2	69	.1

3.3.9 Employment

The Employment size in all enterprises, eligible for formal/informal sector definition, amounts to 370,477 persons of whom 157,827 (about 42.6 percent) belong to formal enterprises. This means that although the prevalence of formal enterprises in the country is as low as nearly 7 percent it absorbs a high proportion of working persons.

The results reveal that, while the vast majority of working persons in informal enterprises concentrate in only two Economic activities (46.7 percent in Whole sale and

retail trade; repair of motor vehicles and motor cycles and 31.7 percent in Accommodation and food service activities), the distribution of formal enterprises' employment over economic activity does not suffer from similar acute inclination, rather employment is distributed over a wider range of economic activities (Table 3.12).

Table 3. 12: Distribution of Formal/Informal Employment according to Economic Activity

Economic activity	Formal/Informal for Private & Public					
	Total		Formal		Informal	
	No.	Percent	No.	Percent	No.	Percent
Total	370,477	100.0	157,827	100.0	212,650	100.0

Administrative and support services activities	11,247	.6	9,764	2.1	1,483	.5
Education	36,132	1.0	34,045	12.9	2,087	.2
Human health and social work activities	16,575	.5	15,875	5.1	700	.2
Arts, entertainment and recreation	919	.1	709	.3	210	.0
Other services activities	17,535	5.7	1,893	2.6	15,642	6.0

Table 3.13 shows the district distributions of employment in formal and informal enterprises. Concerning formal enterprises, the three districts of Kigali City contain altogether about 47.4 percent of the employment in formal enterprises. The level in other districts ranges from 1.0 percent in Nyabihu to 4.8 percent in Rulindo. Regarding informal sector, the employment concentration in Kigali is notably less (21.6 percent), the level in other districts range from 1.7 percent in Gisagara to 4.4 percent in Musanze.

Table 3. 13: Distribution of Formal/Informal Employment according to District

3.3.10 Change in formal/informal enterprises

It is worth noting that, for the purpose of comparison, 2014 establishment censuses is limited to private enterprises as well as business oriented mixed sector enterprises which have been exclusively considered in the 2011 establishment census.

Table 3.14 presents changes in formal/informal enterprises from 2011 to 2014. During the three-year period the formal sector accomplished higher growth (43.7 percent) as compared with informal sector (24.8 percent). Looking at the economic activities

differentials in the growth level, it is found that the highest growth was achieved by mining and quarrying for both formal and informal sector; 452.2 percent and 594.4 percent respectively. Other economic activities which achieved a high growth in formal sector are transportation and storage (76.5 percent), Financial and insurance activities (68.8 percent) and manufacturing (65.9 percent). As for the remaining economic activities which experienced growth in formal sector, the growth rate ranges from 9.1 percent for Art, entertainment and recreation to 52.3 percent for other services activities.

As for the declining formal enterprises, the highest decrease is noted for Real estate activities (57.1 percent) followed by Electricity, gas, steam and air conditioning supply (45.8 percent), Information and Communication (40.2 percent) and Human health and social work activities (8.7 percent).

In the informal sector, in addition to Mining and quarrying for which the highest increase rate was found, the enterprises in the following economic activity have achieved a remarkable growth: Other service activities (51.7 percent), Construction (35.3 percent) and Accommodation and food services activities (34.2 percent). The growth level of the remaining growing economic activities fluctuates between 16.1 percent for manufacturing and 22.4 percent for Administrative and support services activities.

Among the economic activities of the informal sector which have experienced decline between 2011 and 2014, the following economic activities have been remarkably decreased: Electricity, gas, steam and air conditioning supply (100 percent), Finance and Insurance activities (100 percent), Real estate activities (90 percent) and Water supply, sewage, waste management and remediation activities (89.7 percent). The decrease rate of the remaining declining economic activities in the informal sector, range from 2.9 percent for Human health and social work activities to 23 percent for Information and communication activities.

Table 3. 14: Change in formal/informal from 2011 to 2014 of private enterprises and business oriented mixed enterprises by economic activity.

Annex

Annex A : Concepts and Definitions

1. Establishment

It is an enterprise or part of an enterprise with constant site, performing one or more economic activity under one administration. Holder of the establishment could be natural or nominal person or governmental body. Accordingly, elements of the establishments are: a. Constant site; b. Practice of economic activity; c. Holder (natural or nominal).

Establishment definition does not include:
 Street Vendors
 Taxis and Motor drivers
 Roads and buildings construction sites
 Temporary booths
 Closed stores of establishments without workers.

If the establishment:

- Practices its activity in more than one place, whether it was identical, integrated or similar activity, and no separate data are available, all places are treated as one establishment , so long as the holder is the same.
- Practices more than one activity in one or several places, each activity will be treated as separate establishment, as long as there is separate account for each activity.
- In case data could not be separated for each activity, then it will be treated as one establishment and the predominant activity will be considered as the main activity of the establishment.
- If there were many holders practicing their activities in one place, each holder's establishment is considered separate establishment, even if the activity was the same.

2- Working status

Working status refers to the status of an establishment during the data correction period. Three categories were identified:

- **Working establishment:** The establishment in which workers practice one or more economic activity.
- **Closed temporarily :**The establishment that practices an economic activity, the prerequisites of carrying out this activity are available and employs workers, but it is temporarily closed for the duration of the census for any reason (maintenance, decoration, travel of holder ... etc.). All temporarily closed establishments were captured during subsequent visits of the interviewers.

- **Closed Permanently:** The establishment that stopped practicing its works for any reason (bankruptcy, desire of holder to leave work ... etc.), and obviously it does not have any workers practicing any economic activity but probably some materials used before the closing may still be present on the site indicating that some kind of economic activities may have been practiced in this place.

3- Working Place

The working place of an establishment refers to the place where the establishment operations were carried out during the establishment census data collection. Three categories of working place were identified: Within markets, outside market and industrial zone.

Generally local market is a place surrounded by a wall and has one or more entrance, in which several establishments exist. Example of local market is NYAMIRAMBO market.

4- Institutional Sector

To get information on establishments' institutional sector, the following categories were identified:

- **Private sector:** It is a business establishment owned and run by one or more household members for their own benefit, or owned and run by one or several persons outside the household.
- **Mixed sector:** It is an establishment for which the State contributes to its capital with another body, whether national or foreign.
- **Public sector:** It is an establishment whose capital is totally owned by any governmental organization.
- **Cooperative:** A cooperative is an autonomous association of persons united voluntarily to meet their common economic, social, and cultural needs and aspirations through a jointly-owned and democratically-controlled enterprise, according to internationally recognized co-operative values and principles".
- **Local Non-Governmental Organization-LNGO** A local non-governmental organization (NGO) is an organization that is neither a part of a government nor a conventional for-profit business for which the organisation of its operations does not go beyond Rwanda. Examples of such establishments are: political parties; Sports and social clubs; and unions and syndicates.
- **International Non-Governmental Organization-INGO** It includes non-profit establishments which are organised at the international level and operating in Rwanda. (e.g. World vision, World relief, Compassion international...etc.)

Diplomatic offices of other countries such as embassies as well as offices affiliated to regional and international organizations such as UNDP, UNICEF, AfDB were not covered in this census

5- Ownership nationality

The ownership nationality refers to the nationality of the persons who have control of an establishment, i.e. whether the capital is totally owned by Rwandan citizens or Rwandan organization; joint ownership with other countries businessmen, organizations, or governments; or entirely owned by foreign investors or organizations. It is important to point out, in this context, that ownership refers to capital (fixed assets and operating capital) not to the premises ownership which may be rented from Rwandan citizens or organizations.

6- Major Economic Activity

This is the type of actual work practiced by the establishment, whether it is pertinent to goods production or service providing, regardless of the establishment sector or ownership. The 2008 International Standard Industry Classification version (ISIC-2008) was used to classify the economic activity of all establishments.

Not only the main economic activity was asked about, information was collected on the second important economic activity in case if the establishment practices multiple economic activities.

7- Legal Status

The legal status of business establishments takes the following forms:

- ***Sole Proprietorship:*** It is a Private establishment/enterprise in which the owner is a single person.
- ***Limited by shares:*** It is an establishment/enterprise in which the liability of shareholders is limited to the total value of subscribed shares, whether paid or not.
- ***Limited by guarantee:*** It is an establishment/enterprise formed on the principle of having the liability of its members limited by its constitution to such amount as the members may respectively undertake to contribute to the assets of the company in the event of its being wound up.
- ***Limited by shares and guarantee :*** It is an establishment/enterprise formed on the principle of having the following liability of its members limited to:
 - The amount paid by shareholders or the amount agreed to pay on the shares held by them.
 - The security issued by shareholders equivalent to the amount agreed as surety in case of going out of business.
- ***Unlimited:*** It is a private establishment/enterprise formed on the principle of having no limit placed on the liability of its shareholders (owners).

The legal status was limited to private sector as well as business-oriented mixed sector establishments.

8- Registration:

Establishments can be registered in one or more of the following registration types:

- **Social Security Fund (RSSB):** Within eight days after the date in which the establishment hires one or more workers, the employer must submit a registration application to the Social Security Fund. If one enterprise has several establishments, each with separate accounts, the employer establishes a separate registration application for each establishment.
- **Rwanda Revenue Authority:** The Rwanda Revenue Authority was established under law N° 15/97 of 8 November 1997 as a quasi-autonomous body charged with the task of assessing, collecting, and accounting for tax, customs and other specified revenues.

According to the law number 25/2005 of 04/12/2005 on tax procedures, any person who sets up a business or other activities that may be taxable is obliged to register with the Tax Administration within a period of seven (7) days from the beginning of the business or activity or the establishment of the company.

- **Rwanda Development Board:** The Rwanda Development Board (RDB) is the principal Government Agency responsible for helping investors to realize their investment projects in Rwanda. The Registrar's office at RDB acts as a one-stop shop which takes care of all formalities relating to the start-up of the business in Rwanda.
- **Private Sector Federation (PSF):** Private establishments may also be registered in PSF.
- **Districts:** According to their size, some establishments may be registered at the district authority.
- **Sector:** A small establishment can be registered at sector authority.
- **Rwanda Cooperative Agency:** Rwanda Cooperative Agency registers cooperatives that are operating in Rwanda.
- **Rwanda Governance Board(RGB):** NGO's may seek registration at RGB

9. Type of taxes

The definitions of major types of taxes are given in the following:

- **VAT:** Any establishment which carries out taxable activities exceeding twenty million Rwanda Francs (20,000,000 RWF) in the previous fiscal year, or five million Rwanda Francs (5,000,000 RWF) in the preceding calendar quarter is required to register for VAT with the tax administration within a period of seven (7) days from the end of the year or from the end of the quarter mentioned above. Any establishment which is not required to register for VAT according to the provisions of above paragraph may voluntarily register with the tax administration for VAT²
- **Income tax:** Here the income includes business profit, investment income for both individuals and establishments. Business profit is determined as the income

² Official Gazette No. special of 5/02/2013: law n°37/2012 of 09/11/2012 establishing the value added tax.

from all business activities excluding all business expenses. Business profit also includes proceeds of sale of any business asset and liquidation proceeds received during the tax period. All such income sources are subject to income tax.³

Income derived from investment includes any payments in cash or in kind received by the establishment in the form of interest, dividend, royalty, or rent which has not been taxed as business.

- **Excise tax:** Excise tax is a tax levied on locally produced beers, lemonades, mineral water, juices, liquors, wines, fuel, vehicles, powdered milk as well as on cigarettes and their imported counterparts and on telephone communication.⁴
- **Import duties tax:** It is withheld tax of five percent (5Percent) of the value of goods imported for commercial use which is paid at custom on the cost insurance and freight value (CIF) before the goods are released by customs.⁵
- **Trading license tax:** Trading license tax is a tax paid every year by the individuals who have decided to undertake any profit-oriented activity in Rwanda. Legally registered organizations or companies which are liable for the corporate tax should also pay the trading license tax annually.⁶

10- Regular Operational account.

Some tax payers are requested by the law to keep books of accounts according to the national account plan for taxes purpose. Books of accounts may be done manually or by computer and must show the annual loss and profit account.

The books of operational account are following: Journal, ledger, trial balance, profit and loss account and balance sheet.

11- Capital Employed

The capital employed is the value of the assets that contributes to the establishment ability to generate revenue. In other words, it is the value of fixed assets plus current assets minus current liabilities. When the establishment maintains regular accounts/records the capital employed is valued as of the beginning of the present fiscal year. In case of absence of regular accounts/records, the capital employed is estimated, at the market price, at the time of the interview.

12-Annual total turnover

In general, an entity's annual turnover means the value of all supplies that are made within a twelve-month period. Turnover is meant to adjust for the inflows and outflows of cash and report on the level of trading activity.

13-Establishment Type

³ Law n°73/2008 of 31/12/2008 modifying and complementing law n° 16/2005 of 18/08/2005 on direct taxes on income.

⁴ Law n° 26/2006 of 27/05/2006 determining and establishing consumption tax on some imported and locally manufactured products

⁵ Law n° 24/2010 of 28/05/2010 modifying and complementing law n° 16/2005 of 18/08/2005 on direct taxes on income

⁶ Law no. 59/2011 of 31/12/2011 establishing the sources of revenue and property of decentralized entities and governing their management.

The establishment type is related to the level of establishment. An establishment may be a head office; single unit entity; branch or sub branch.

- **Head office:** When an establishment has several branches located in different parts of the country, the head office includes the managerial staff for this establishment. In addition to management, the head office may practice other economic activities such as sale and advertisement. The head office is generally located in a different place from that of the branches; however, it can be located within the same premises as of one of its affiliated branches. In the latter case, it will be considered separate establishment so long as it maintains separate records than that of the branches and has a working place which can be distinguished from that of the branch.
- **Single unit establishment:** This is a stand-alone establishment which does not belong to any bigger enterprise located in Rwanda.
- **Branch:** It is an establishment which belongs to a bigger enterprise (i.e. having several branches). The head office of such enterprise must be located inside Rwanda.
- **Sub branch:** Sometimes a branch includes several sub-branches as it exists for some banks.

14-Employments

The number of working persons has been ascertained in three different ways:

- Number of employees categorised by nationality (Rwandans, Foreigners) and gender,
- Number of unpaid workers categorised by reason of being unpaid and gender
- Number of paid workers sorted out by the duration of contract and gender. The contract duration has been specified as:
 - **Below 1 Month:** That is the employment contract must not exceed one month,
 - **1-6 Months:** Is the employment contract which is the interval of 1 to 6 months,
 - **Above 6 Months:** Is the employment contract of over 6 months,
 - **Indeterminate:** Is unspecified period of employment contract (e.g. Civil servant contract).

The Paid worker: refers to a worker who receives salary, whether in cash or in kind.

The Unpaid worker: refers to a worker who does not receive a salary for work performed.
